Denver Managing Partner Talks Avoiding Liability in Autonomous Vehicle Cyberbreaches

6.30.19

Autonomous vehicle technology will completely change life as we know it. Because AVs need to communicate with each other, cybersecurity needs to be a top concern for companies selling and utilizing AVs. In a contributed article for The Robotics Law Journal, Mike Greco shares eight tips for companies to avoid AV cyberbreach liability, including identifying susceptible information, preparing your response plan, communicating across the supply chain, training employees and considering cyber liability insurance.

This article is only available in June 2019’s print edition of The Robotics Law Journal.
