

Fisher Phillips Launches Autonomous Vehicles Practice Group

ATTORNEYS WILL GUIDE EMPLOYERS THROUGH CHALLENGES AND OPPORTUNITIES THE EMERGING TECHNOLOGY BRINGS TO THE WORKPLACE

News

9.10.18

ATLANTA (September 10, 2018) – Fisher Phillips announces that it has launched its Autonomous Vehicles Practice Group, the first practice group of its kind among the nation’s leading labor and employment law firms representing employers that will focus entirely on the technology’s impact on the workplace and workforce. The firm will help to guide employers through emerging workplace issues that are likely to arise from rapid advancements in autonomous vehicle technology.

The practice is led by Michael Greco in Denver and includes lawyers across the United States. The Autonomous Vehicles practice will address the emerging technology’s impact on workplace safety; labor, unionizing and collective bargaining; employee defection and trade secrets; data privacy and security; gig economy workers; government advocacy and general employment matters.

“Autonomous vehicles are on the brink of changing our lives in dramatic ways,” said Michael. “As companies evolve to embrace and deliver these rapidly-changing technologies, workplace legal issues will be introduced that will have profound impacts on how employers manage and interact with employees. Fisher Phillips is well positioned to advise clients across the U.S. on the unique challenges and opportunities this technology brings and how it will shape the workplace and workforce of the future.”

The firm has also launched its [Autonomous Vehicles Blog](#) to keep employers informed of the rapid advancements in the autonomous vehicle industry that may impact their workplaces.
