

Construction Employers Would Be Remiss Not to Sweat the Increased Risks of Heat Exposure

Publication

6.08.21

In a bylined article published by *Construction Executive*, **Curt Moore** reminds employers of the legal risks associated with heat-related hazards on the jobsite. He explains the importance of construction employers having an effective heat-stress program that trains employees on how to recognize and prevent heat-related illness and symptoms. Curt also provides additional steps that employers should take to lessen the risks of heat exposure as the summer months draw near.
