

# New Orleans Partner Contemplates Timeline for Autonomous Vehicle Adoption

Publication

10.18.18

Autonomous vehicles have quickly moved from novelty items introduced by Silicon Valley tech companies to mainstream products under development by the traditional automakers. In his article for *RoboticsTomorrow*, New Orleans partner Dennis Cuneo offers his own opinion on the timing of autonomous vehicle technology becoming mainstream, stating, “I believe we’ll see at least 10 percent of all miles driven in Level 4 vehicles (fully autonomous in most situations) by 2030, with the initial deployment in large metro areas.”
