Insights

3.16.23

Fisher Phillips is providing a collection of our recent Insights on various topics as a convenient summary for those wanting a good overview of certain areas of law. The first collection: a review of recent developments in the pay transparency and pay equity arena. There may be nothing more fundamental to the employment relationship than the act of paying your employees for their services – and there is an increasing focus on ensuring you do so in an equitable manner. What do you need to know about the state of the law in this area?

## Pay Transparency

An increasing number of states, regulators, and courts have recently taken steps to impact the way you can – and should – communicate with your employees about pay. In general, these new laws require employers to make pay range information available to internal and external candidates when advertising open positions, or at some point during the hiring process.

California, Colorado, Connecticut, Maryland, Nevada, New York, Rhode Island, and Washington have all enacted pay transparency measures of one type or another. In addition, numerous other states are proposing similar legislation.
