The Fisher Phillips AI Workplace Forum is the nation's preeminent space focusing on the intersection of AI and all things employment – the singular place where innovative business leaders will get the news on how AI will be impacting their operations.

Join our next biweekly 30-minute rapid-fire session to hear firm leaders discuss the latest AI trends and breaking news. You'll have a chance to weigh in on the discussion and interact with the hosts and panelists during these engaging sessions. Up for discussion this week: we now live in a world where you can't trust everything you see on video thanks to the rise of deepfakes. These sophisticated digital forgeries threaten to upend many aspects of our lives – including the workplace. This session will provide some employer best practices to prepare you for this latest threat.
