Manufacturing Success, Episode #9, Part 2: Embracing...

AI is quickly becoming an essential operational and strategic tool for employers in all industries, and manufacturing is no exception. From optimizing organizations' HR functions to ensuring work environments are safe and productive, AI is influencing just about every aspect of work. And we are just scratching the surface on understanding the value this technology can drive.

In this two-part episode of "Manufacturing Success," Michael Carrouth is joined by David Walton, the Chair of Fisher Phillips' Artificial Intelligence Team, for a discussion about how manufacturing employers can and should leverage this technology, and how doing so correctly can create a sustainable competitive advantage for any manufacturing employer.
