Fisher Phillips AI Forum – How to Make Sure Your Employees Don't Fall in Love with Your AI Robots

Event
9.04.24
2:00 PM — 2:30 PM EDT

The Fisher Phillips AI Workplace Forum is the nation's preeminent space focusing on the intersection of AI and all things employment – the singular place where innovative business leaders will get the news on how AI will be impacting their operations. Join our next biweekly 30-minute session to hear thought leaders discuss the latest AI trends and breaking news.

Up for discussion this week: the makers of the world's most commonly used AI system just warned users not to fall in love with their new robot, so it's time for employers to prepare for a new challenge. ChatGPT's new "voice mode" is just one of many GenAI products that could soon lead workers to develop unhealthy levels of emotional attachment with AI. What do you need to know about this most modern of workplace developments and what can you do to create healthy boundaries between humans and robots in the workplace?

External Speaker:

Dr. Andrea Elkon | Licensed Clinical Psychologist, Ascend Psychology and Wellness

The firm will submit this program for HRCI and SHRM credit.

If you have any questions, please contact **Paulina Lisicka**.

Fisher Phillips is committed to providing access to all of our events for disabled attendees. Automated closed captioning is available for all of our webinars. For other accommodation inquiries, please give us three business days advance notice prior to the scheduled event by contacting **Paulina Lisicka**. *Thank you.*
