# MONEY MATTERS: LEVERAGING AI FOR PAY EQUITY – OPPORTUNITIES AND CHALLENGES

Event

Oct 21, 2024

12:00 pm - 1:00 pm EDT

Join members of the Fisher Phillips Pay Equity practice group for a webinar designed to explore the ways in which artificial intelligence (AI) is reshaping the conventional thinking around how businesses work to achieve pay equity objectives.

AI is rapidly becoming an indispensable tool for businesses with legal and organizational mandates to pursue practices that promote pay equity in the workplace. Critical issues, including practices related to hiring, termination and fair employment are being redefined and enhanced in what may feel like real time, and savvy employees are learning how to take advantage of AI's vast potential. But like any transformative technology, opportunities and offsetting risks go hand in hand.

Attendees will come away with a demystified understanding of the basics of the AI and the impact it is having on the pursuit of pay equity objectives. They will learn best practices for leveraging AI in the workplace of law, while mitigating the associated risks inherent to complex technological advancement.
