

# TRUMP ROLLS BACK BIDEN'S AI EXECUTIVE ORDER AND MAKES AI INFRASTRUCTURE PUSH: KEY TAKEAWAYS FOR EMPLOYERS

Insights  
Jan 23, 2025

In the first few whirlwind days of President Trump's new administration, the White House enacted a sweeping shift in AI policy: rescinding President Biden's executive order on artificial intelligence on Monday and announcing a massive private-sector-led AI infrastructure investment on Tuesday. The moves signal a sharp departure from the prior administration's regulatory approach, replacing AI oversight with a focus on economic growth and national competitiveness. Employers and AI industry leaders must now deal with an evolving landscape where AI regulation is loosened and investment in AI development is skyrocketing. What are the key takeaways for employers? **[Ed. Note: Soon after publication of this Insight, Trump issued his own executive order on AI – see below for quick description.]**

## Trump Rescinds Biden's AI Executive Order

One of Trump's first executive actions was revoking [Executive Order 14110, Biden's comprehensive AI policy](#) aimed at ensuring safe and ethical AI deployment. The original order required AI developers to report safety testing results to the federal government and created the U.S. AI Safety Institute within the Department of Commerce to establish AI standards and risk assessments. It also required all federal agencies to appoint Chief AI Officers, while specifically requiring the Department of Labor (DOL) to develop a plan for how federal agencies can prevent unnecessary job elimination or displacement in the private sector.

## Key Takeaways

- AI companies are no longer required to report safety test results for large-scale AI models.
- The role of the U.S. AI Safety Institute is uncertain. While created by the executive order, its regulatory function may be minimized.
- Federal AI guidance issued under Biden – [including the AI Sheet for Employers](#) – is now in limbo, raising questions about existing agency policies and compliance measures.
- National security and economic competition now take center stage, as Trump’s administration frames AI as a geopolitical challenge against China with no appetite for [a European-style level of regulation](#). With the new AI Czar, [David Sacks, taking a pro-innovation, anti-regulation stance](#), U.S. AI policy is likely to favor competition over caution.

While high-tech companies expressed optimism about a more business-friendly approach, critics warned that removing guardrails could lead to long-term risks in AI safety and security.

## AI Infrastructure Surge: The \$500B Stargate Initiative

While rolling back regulations, Trump simultaneously announced an historic AI infrastructure investment led by a series of high-tech private sector companies. The initiative, named Stargate, will:

- Begin with a \$100B investment, with a goal of reaching \$500B over four years.
- Focus on AI data centers and computing power, starting in Texas and expanding nationwide.
- Create over 100,000 jobs in AI-related industries.

## What This Means for Employers

These events taken together offer three clues to employers about what you can expect in the coming years:

### **Reduced Compliance Burdens**

- Employers using AI no longer face mandatory federal reporting requirements.

## Resource Hubs

[Trump Administration](#)

[Resource Center for Employers](#)

- AI-related employment discrimination guidance from the [E DOJ](#), and [DOL](#) could be reconsidered or scrapped.
- Stay tuned for a Trump White House executive order on AI, emphasizing a light-touch approach to industry and employment regulation.

[Ed. Note: Trump's Jan 23 [executive order](#), issued soon after publication of this Insight, calls for a group of regulators to develop new AI policy within six months intended to ensure "global AI dominance."]

### ***Expansion of AI-Powered Industries***

- The \$500B Stargate initiative will fuel AI adoption in health care, manufacturing, and defense.
- Companies involved in data centers, cloud computing, and AI production will see new investment opportunities.

### ***Patchwork State Regulation Means Governance Becomes More Important***

- With federal oversight scaled back, state laws (such as the place in [Colorado](#) and [Illinois](#), and those planned in states like [New York](#), [California](#), and [New Jersey](#)) will play a larger role in AI governance.
- Employers may need state-specific compliance strategies rather than relying on federal guidance.
- [An AI governance program](#) is essential for all employers.
