STEPHEN SCOTT AUTHORS ARTICLE ON CYBERSECURITY AND PHISHING THREATS

News
Sep 10, 2026

In an opinion piece published by *DJC Oregon*, **Stephen Scott** discussed the evolving cybersecurity landscape and how artificial intelligence is making phishing attacks increasingly difficult to distinguish from legitimate communications.

"Generative AI is eliminating many of those tells. Attackers can now create polished, personalized and context-specific messages in seconds — messages that sound like your boss, reference your company, mimic a vendor, or, apparently, invite your 5-year-old to a birthday party at Sky Zone," wrote Stephen.
