This complimentary event is a great opportunity to network and talk with our lawyers in an informal and collaborative setting to get the information you need to stay in the know.

The American economy is driven by innovation. Innovation requires skilled workers who can transform those ideas into marketable products. To remain competitive, employers in STEM industries must have a strong understanding of the market for foreign talent, their interests and long term strategies for retention. This presentation will cover the basics on the key visa categories and permanent residence process but will also provide best practices for establishing a successful immigration program that attracts and keeps global talent.
